

## ISOCLIN NBR-950A

### DESCRIPTION

---

- **LubeRite ISOCLIN NBR-950A** is a premium solvent cleaner composed of Isoparaffin Hydrocarbons and a Brominated Solvent. This cleaner is particularly designed as a more environmentally friendly and less harmful replacement for pure Halogenated and Chlorinated Cleaners like Methylene Chloride, Trichloroethylene, and Perchloroethylene, for manual metal cleaning.

### APPLICATION

---

- Specially formulated for cleaning or degreasing operations on any type of metal by wiping, spraying, or dipping.

Note: This product is not suitable for vapor degreasing or ultrasonic machine use because of its flammability.

### TYPE

---

- Low Odor Medium Dry Hydrocarbon Solvent Cleaner

### PERFORMANCE AND BENEFITS

---

- Evaporates completely without leaving any residue.
- Very good and strong degreasing property.
- Multi metal application means less inventory of different cleaners.

### PHYSICAL PROPERTIES

---

Physical State	Light Volatile Liquid
Appearance	Clear
Color	Water White/Colorless
Flash Point, COC, °C	10
Density	0.84 – 0.86
Surface Tension at 25°C	21
Water Solubility	Non-soluble

- Will not affect most industrial plastics, especially polyethylene.
- Non-staining so it will not affect the color or appearance of materials.
- Low odor ensures good worker comfort.
- Does not contain benzene or aromatic solvents, so it is safe to use and is ozone friendly.

### HEALTH AND SAFETY

---

- This product will not pose a significant health and safety hazard if used in the recommended application and proper industrial safety practices and common sense are observed. Always observe good ventilation during use to prevent accidental fire and excessive inhalation. Wash skin with soap and water after contact. Do not discharge into drains or bodies of water. See the MSDS for complete safety details.

### AVAILABLE PACKAGING

---

- 20-liter pails and 200-liter steel drums.
