

DESCRIPTION

- **LubeRite PL 1000HY** is a oil based plunger lubricant designed for superior tip and sleeve protection even in larger diameter chambers. It provides excellent "creep" tendencies, providing good flow characteristics during application. PL 1000HY is a blend of clean oils, reducing the amount of smoke emissions normally associated with petroleum products. It is very economical to use and withstands the higher temperatures encountered in the shot sleeve.

APPLICATION

- Oil Based Plunger Lubricant

METHODS OF USE

- Application: PL 1000HY is supplied ready for use.

AVAILABLE PACKAGING

- 20 liter pails and 200 liter drums.

PHYSICAL PROPERTIES

Appearance	Amber
Specific Gravity, at 15°C	0.9415
Flash Point, COC, °C	> 240
Pour Point, °C	-7
Viscosity at 40°C, cSt	1010
Viscosity at 100°C, cSt	46.44
Viscosity Index	87
