

DIE-LUBRIC ALP

pasty die-face lubricant

DIE-LUBRIC ALP is a silver coloured, pasty die-face lubricant for the production of aluminium die-castings.

DIE-LUBRIC ALP contains solid lubricants (pigments) and organic materials of high thermal stability.

DIE-LUBRIC ALP is applied manually by swab or brush. Application should be economically and uniformly.

DIE-LUBRIC ALP has excellent release properties and provides bright castings.

It is especially used for difficult castings or to lubricate critical areas of the die (e.g. hot spots, areas which show already thermal cracks etc.).

Packing:

Steel Drum(18 Litres) Net weight: 18Kg/Drum

Only valid in combination with EC-Safety-Data-Sheet.
