

Description

Syntech Non Silicone Spray is a specialist lubricant for highly effective silicone free release. An excellent alternative to silicone spray for the plastic moulding industry. It uses a quick drying solvent and propylene oxide. Stable to 200°C. It is non-chlorinated and is easily removed by ordinary washing, facilitating further product finishing and making it as versatile as it is effective.

Outstanding Features and Benefits

- Non-silicone content to allow for overpainting, lacquering, overprinting, gluing or welding.
- Excellent release and flow properties.
- Virtually odourless mild solvent which 'flashes off'. Easily cleaned off with conventional detergents.
- Colourless thin free flowing liquid

Directions for Use

Ensure surface to be coated is clean and dry. Shake can well before use and spray a light even coat over the surface from a distance of 20 - 30cm. Allow solvents to evaporate before placing components into use.

Technical Data

Appearance	:	Colourless thin free flowing liquid
Odour	:	Virtually odourless
Contents	:	Propylene oxide, hydrocarbon solvents and propellents
Storage	:	Below 50 °C
Temperature range	:	0 - 180 °C (Continuous)/200 °C (Intermittent)
Flash point	:	-40 °C
Pack sizes	:	12 x 400 ml cans
